WHY WOMEN SHOULD VOTE

Arguments Made by Mrs. A. J. George Before Big Anti Meeting in Town Hall—Better Citizenship Not to Come Through Votes—Socialism and Feminism Loom Alarmingly, She Says.

An audience of well over 400 that practically occupied all the seating accommodations at the town hall on Tuesday evening, gave the closest attention to Mrs. A. J. George of Boston who was the speaker at the meeting, held under auspices of the Norwich Association Opposed to the Woman Suffrage. Mrs. George took up point after point of the argument against the woman vote and in several times vigorously applauded for some telling expressions of opinion of a story or two with which she illuminated her argument. Her remarks were held by the anti woman should not have the suffrage.

On the desk stood a basket of American beauty roses and other flowers were in vases at the corners of the desk, while on the wall behind the speaker hung a large American flag. Seated on the platform with the speaker were the officers of the local association, Mrs. C. H. Moore, president, Mrs. Horatio Bigelow secretary, and Mrs. Archibald Mitchell, Jr., treasurer. Rev. R. R. Graham and Mr. Ryder who also occupied seats on the platform.

Introduced the Speaker.

Mrs. Learned opened the meeting shortly after 8 o'clock, saying that she was glad to welcome such a large audience and that the Norwich league of pride in what it had been able to accomplish since its organization four months ago. She took pleasure in introducing Mrs. George, whose abilities and earnestness she had known for a long time. At the present time she is one of the foremost of woman speakers in the anti-suffrage cause.

Mrs. George spoke in an easy yet forceful way, making her points with distinctness and compelling the subject in logical order from the beginning.

The opposing parties to the subject of woman suffrage were more alike in their aims than were apparent on the surface. They both want a better state, more special justice and the ending of the wrongs of the present society. This the suffragist says is to be accomplished by a larger electorate and places emphasis upon laws. Those on her side say give us not more but better voters, not law but the elevation of the standards of character and citizenship.

Burden of Proof on Suffragists.

It is not for us to prove that suffrage would not work well, said Mrs. George. The burden of proof is upon those wanting a change.
